

a BREAKOUT YEAR for

**SILVER
GOLD**

and...

COEUR
THE PRECIOUS METALS COMPANY

**European Gold Forum
April 14, 2010**

Cautionary Statement

This presentation contains forward-looking statements within the meaning of securities legislation in the United States, Canada, and Australia, including statements regarding anticipated operating results. Such statements are subject to numerous assumptions and uncertainties, many of which are outside the control of Coeur. Operating, exploration and financial data, and other statements in this presentation are based on information that Coeur believes is reasonable, but involve significant uncertainties affecting the business of Coeur, including, but not limited to, future gold and silver prices, costs, ore grades, estimation of gold and silver reserves, mining and processing conditions, construction schedules, currency exchange rates, and the completion and/or updating of mining feasibility studies, changes that could result from future acquisitions of new mining properties or businesses, the risks and hazards inherent in the mining business (including environmental hazards, industrial accidents, weather or geologically related conditions), regulatory and permitting matters, risks inherent in the ownership and operation of, or investment in, mining properties or businesses in foreign countries, as well as other uncertainties and risk factors set out in filings made from time to time with the SEC, the Canadian securities regulators, and the Australian Securities Exchange, including, without limitation, Coeur's reports on Form 10-K and Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Donald J. Birak, Coeur's Senior Vice President of Exploration, is the qualified person responsible for the preparation of the scientific and technical information concerning Coeur's mineral projects in this presentation. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, please see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors – The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as “measured,” “indicated,” and “inferred” “resources,” that are recognized by Canadian and Australian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at <http://www.sec.gov/edgar.shtml>

Non-GAAP Measures

We supplement the reporting of our financial information determined under generally accepted accounting principles (GAAP) with certain non-GAAP financial measures, including cash operating costs. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We also provide the amount of our operating cash flow to supplement our cash flow determined under GAAP. We define operating cash flow as net income plus depreciation, depletion and amortization and plus/minus any other non-cash items. We believe operating cash flow is an important measure in assessing the Company's overall financial performance.

The Leader in Precious Metals Growth

- **Rapidly rising cash flow** from 3 new large, long life mines
- **100% precious metals** asset base
- **Kensington-the world's largest new gold mine**-startup in 3Q 2010
- **Leading silver reserve base** with 269 million silver ounces
- **Fastest growing gold reserve base** in our peer group with over 2.8 million gold reserve ounces
- **Organic growth** from several projects in the pipeline
- **Strong balance sheet** with net debt to equity of approximately 14% and cash balance of approximately \$70 million

100% Precious Metals Asset Base

Volumes represent annual estimated production

*Cerro Bayo is not currently in production

Palmarejo Growing Production

- First quarter 2010 production of XXX million oz of silver and xxx million oz of gold with cash operating costs of XX per ounce of silver
- Expect full year 2010 production of 7.9 million oz of silver and 109,000 oz of gold at average cash operating cost of under \$2.50/oz of silver
- 50% increase in silver reserves and 54% increase in gold reserves in 2009

San Bartolomé Enjoying Strong Support

- First quarter 2010 production of XXX at cash operating costs of xxx per ounce of silver
- Full year 2010 production of 7-8 million silver ounces
- Recent expansion into higher-grade Huacajchi area above 4400 meters
- Production increase of xx% 4Q09 to 1Q10

Kensington On Track for 3Q Startup

- Expect 50,000 oz of gold production in 2010
- 125,000 gold oz annual run rate
- Year end proven/probable reserves of 1.5 million gold oz
- Commissioning work for the mill now complete
- Drilling and blasting of the underground rock in process
- Crusher commissioned-final modifications being completed

“Miners will begin drilling and blasting the underground rock next month, getting it ready to haul to a mill facility just down the hill from the portal...Coeur Alaska has hired 106 full-time workers in preparation for gold production” --*Construction of gold mine tailings facility still on schedule*- Juneau Empire, March 26, 2010

Rebirth of Rochester Mine

- Mine in continuous production since 1986, now set to expand again
- New reserves of 25.9 million Ag oz and 233,000 Au oz
- 6 years of incremental production beginning 2011:
 - Average 2.5 million silver oz/yr
 - Average 33,000 gold oz/yr
- Future upside potential
 - M&I of 54.8 million silver oz
 - M&I of 409,000 gold oz
- Residual leaching continues

Three Straight Years of Organic Reserve Growth

Proven & Probable Reserves

Silver (millions of ounces)

Proven & Probable Reserves

Gold (thousands of ounces)

Exploration Priorities Focus on Growth

- \$17.9 million in exploration in 2010 as primary focus on organic growth continues at properties such as:
 - Palmarejo (\$9.2 million)-Guadalupe, La Patria, others
 - Kensington (\$2 million)- Kimberly, Horrible, others
 - Joaquin (\$3.3 million)-La Negra, La Morocha, La Morena

Strong Balance Sheet

(in millions)

	12/31/08	Current	% Change
Cash & Equivalents	\$29	\$65	+124%
1.25% Converts	\$180	\$2	-99%
3.25% Converts	\$230	\$63	-73%
Other Debt	<u>\$69</u>	<u>\$139</u>	+101%
Net Debt	\$450	\$139	-69%

Generating Cash Flow from Recent Investments

(in millions)

Quarterly Operating Cash Flow Compared to Quarterly CapEx

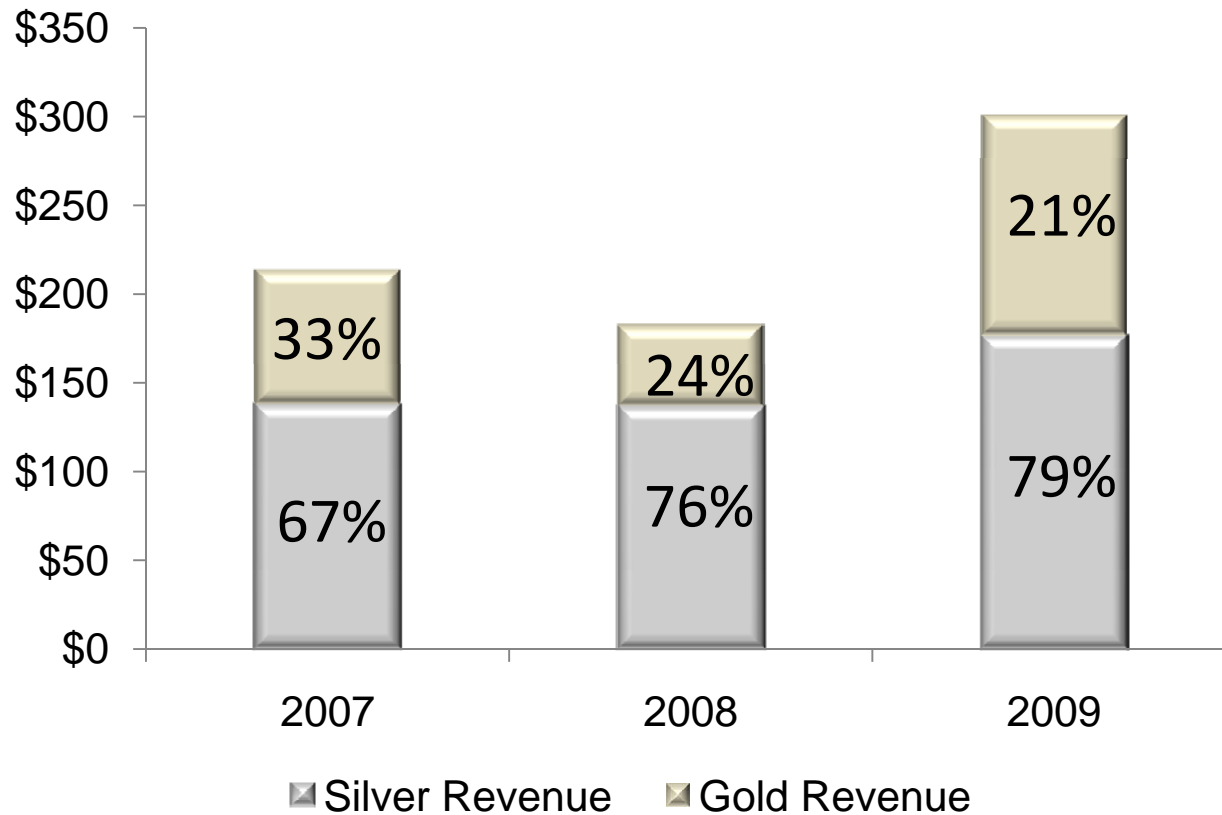

Attractive Metal Sales Mix

(in millions)

- 100% Precious Metals Profile -

Projected revenue to significantly grow with the addition of the Kensington gold mine, which will shift revenue mix to approximately 1/3 gold and 2/3 silver

Strong Global Precious Metals Demand

- U.S. Government deficit spending continues unabated
- Low U.S. interest rate environment likely to remain in place
- Sovereign debt and foreign currency issues remain prevalent
- Investor demand remains robust
- Silver and gold supply picture remains positive

Catalysts for Coeur in 2010

- Q3 2010 production startup at **Kensington**
- Continued silver recovery increases at **Palmarejo**
- Expansion into additional high grade areas at **San Bartolomé**
- Exploration results at **Joaquin, Kensington, Palmarejo**
- Progress toward expansion at **Rochester**, leading to new silver and gold production in 2011
- Continued rapid increases in cash flow
- Continued favorable precious metals environment
