Cautionary Statement

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended which are intended to be covered by the safe harbor created by such sections and other applicable laws. Such forward-looking statements include, without limitation: (i) estimates of future mineral production and sales; (ii) estimates of future costs applicable to sales, other expenses and taxes, for specific operations and on a consolidated basis; (iii) estimates of future capital expenditures, construction, production or closure activities; (iv) statements regarding future exploration potential, expenditures, results, reserves resources and NRM; (v) statements regarding fluctuations in capital and currency markets; (vi) statements regarding potential cost savings, productivity, operating performance, and cost structure; (vii) expectations regarding the development, growth, mine life, production and costs applicable to sales and exploration potential of Boddington, Batu Hijau, Ahafo, Akyem, Yanacocha, Conga, La Herradura, Hope Bay, Subika Expansion, Nevada Phoenix Copper, Chaquicocha and the Company’s other projects, including in Nevada, Latin America and Australia/New Zealand; and (viii) expectations regarding the impacts of operating, technical or geotechnical issues in connection with the Company’s projects or operations. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s early stage and other projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; and (vii) the accuracy of our current mineral reserve and mineral resource estimates. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the “forward-looking statements”. Such risks include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, political and operational risks in the countries in which we operate, and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company’s 2009 Annual Report on Form 10-K, filed on February 25, 2010, with the Securities and Exchange Commission, as well as the Company’s other SEC filings. The Company does not undertake any obligation to release publicly revisions to any “forward-looking statement,” including, without limitation, outlook, to reflect events or circumstances after the date of this news release, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued “forward-looking statement” constitutes a reaffirmation of that statement. Continued reliance on “forward-looking statements” is at investors’ own risk.

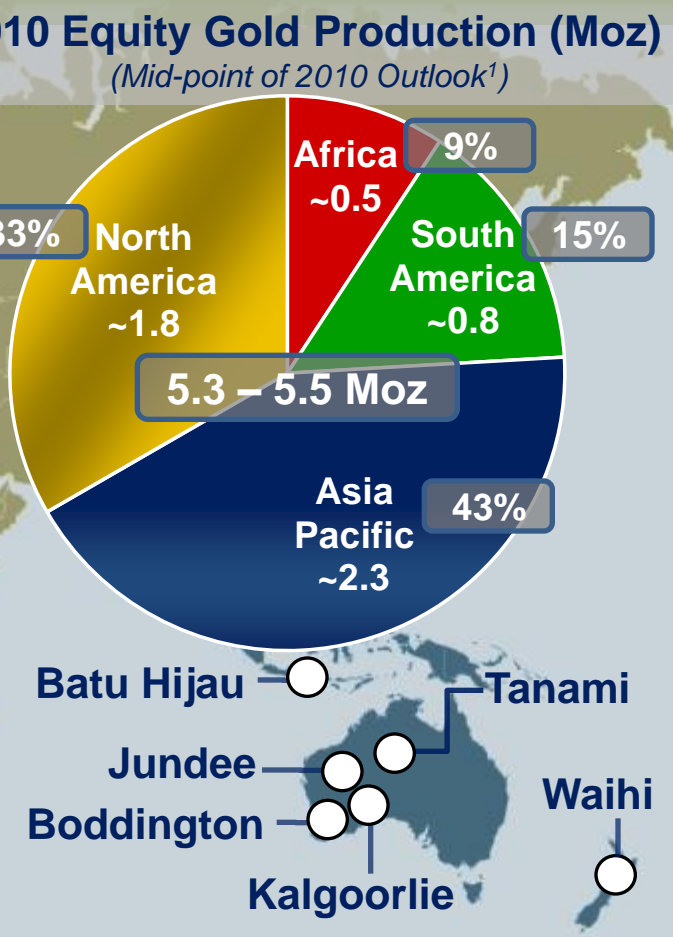

Execution

Demonstrated Execution and Operational Excellence

- ☑ Portfolio continues to meet or exceed expectations with ongoing focus on cost containment
 - ☑ Record revenue, earnings and operating cash flow in 2009; strong H1 2010
 - ☑ Significant liquidity and balance sheet strength to fund internal project development
 - ☑ Return of capital to shareholders through 50% increase in regular quarterly dividend
-
- ☐ Deliver on 2010 operating outlook
 - ☐ Continue to focus on the ramp-up of Boddington
 - ☐ Aggressively advance project pipeline: Nevada portfolio, Akyem, Conga and Hope Bay
 - ☐ Drive further value creation through operating and business efficiencies
 - ☐ Increase exploration and development campaign to fill the project pipeline

Execution

Global Portfolio of Operations

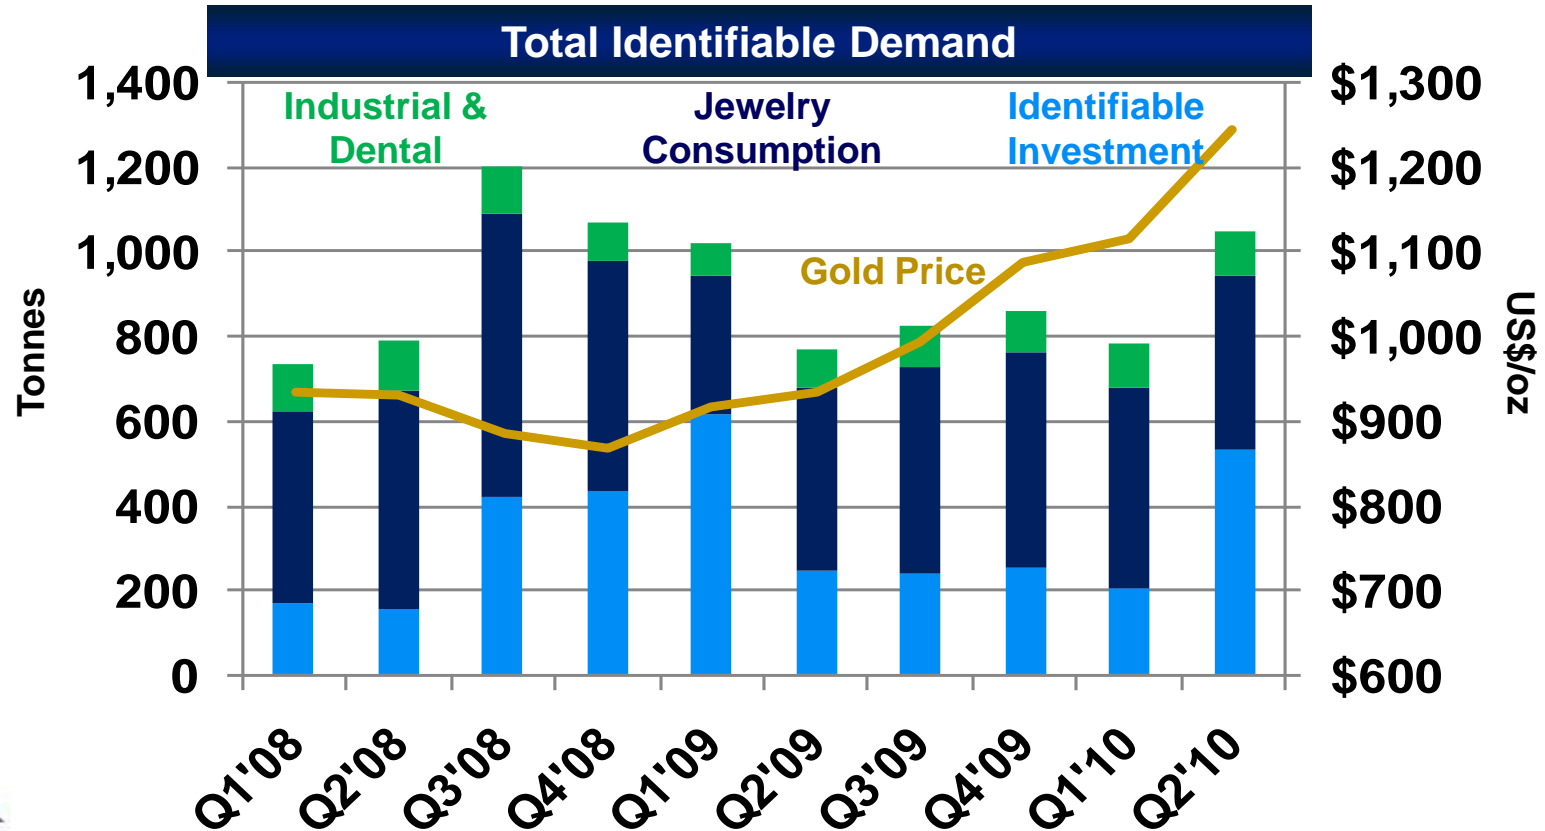

¹ 2010 Outlook refers to outlook issued on 7/28/2010. See cautionary statement regarding reliance on outlook data on slide 15

Cash Flow

Bullish Gold Environment –

Investment demand continues to add support to gold price

- Identifiable investment demand up 118% from Q2'09
- Central Banks net purchasers of 46 tonnes of gold in 2010
- Sovereign debt levels continue to rise; financial market confidence waning

Cash Flow

Margin expansion generating strong cash flow TODAY

Gold Gross Margin- 2005 to 2010 Proforma¹

¹ 2010 proforma based on high end of 2010 CAS Outlook as of 7/28/2010 and avg. realized gold price of \$1,200/oz

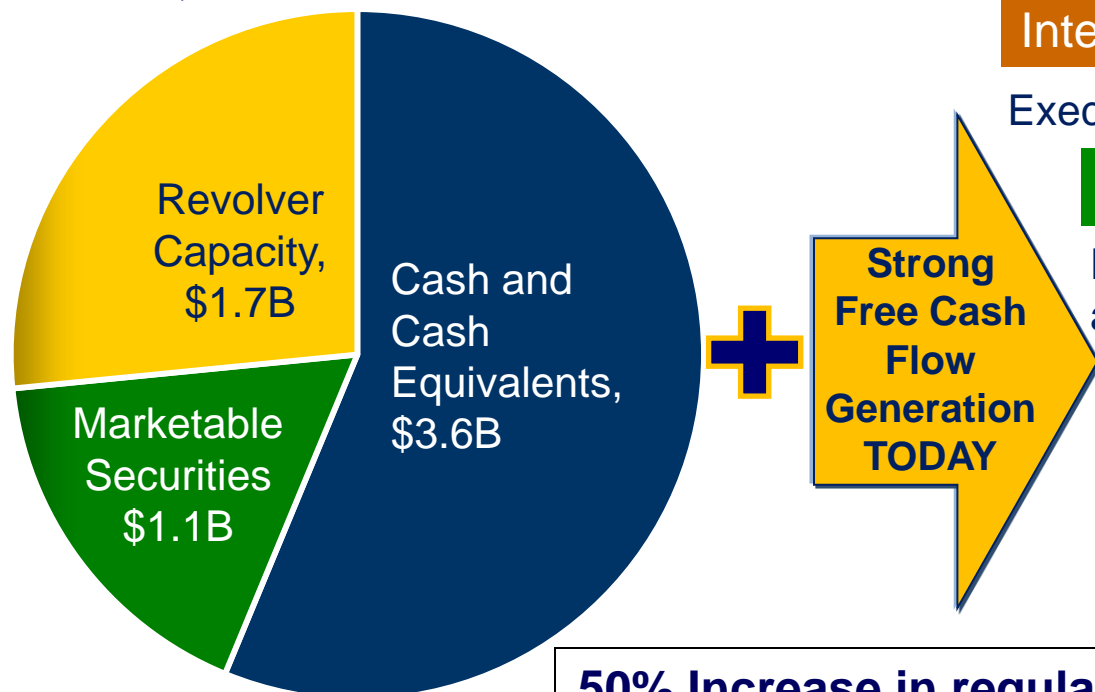

² Calculated using \$3.00 copper price, midpoint of gold and copper production and midpoint of copper CAS. 2010 Outlook as of 7/28/2010

Flexibility

Strong Balance Sheet provides maximum flexibility

Over \$6.3 Billion in Available Liquidity¹

As of June 30, 2010

50% Increase in regular quarterly dividend

Uses of Available Cash

Internal Project Development

Execute our advanced projects

Exploration

Discoveries and reserve additions across our global districts

Opportunistic M&A

Extend mine life, lower costs and improve growth profile

Return of Capital

Dividend increase

¹ Equity liquidity equivalent as of June 30, 2010 includes approximately \$2.94B Cash and Cash Equivalents, \$1.1B Marketable Securities and \$1.7B Revolver Capacity

Optionality

Equity investment of \$4-5 billion to execute our advanced projects with 30-45 million targeted equity ounces¹ and 4-5 billion targeted equity pounds²

Advanced Development Opportunities

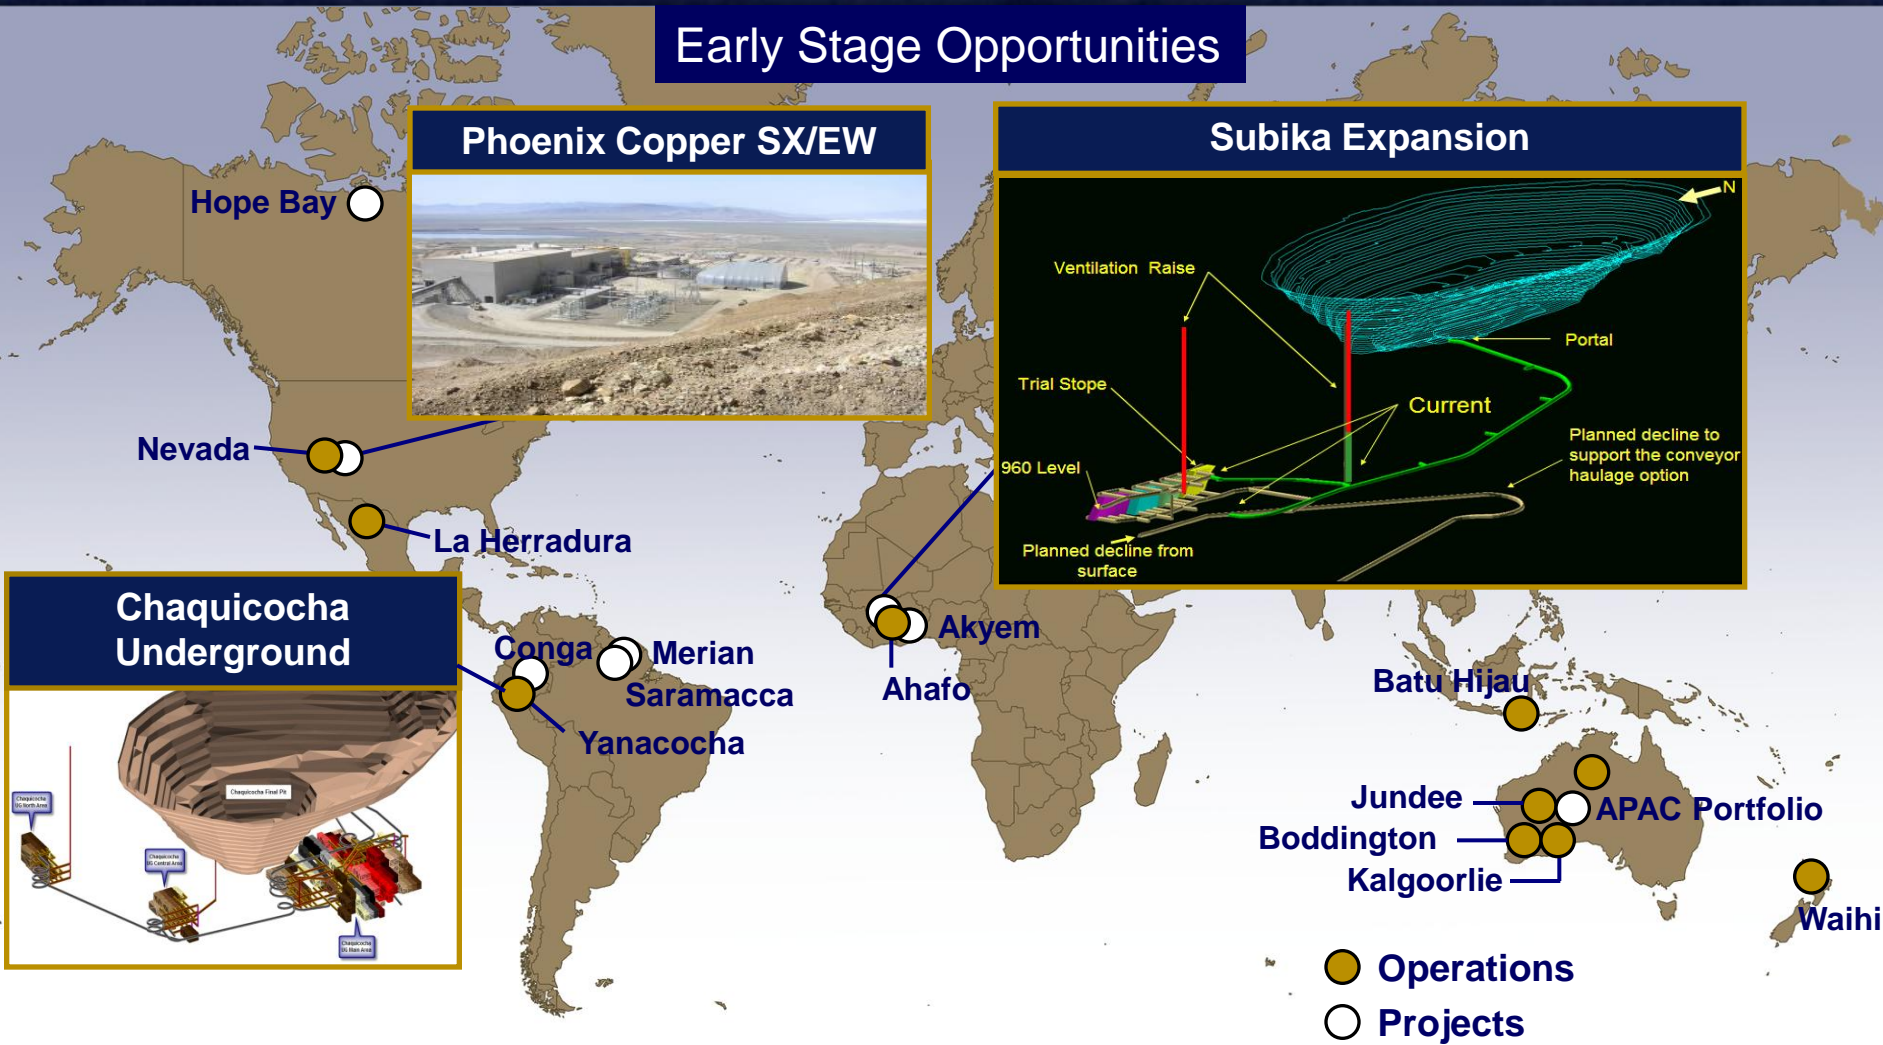

¹ Of the 30-45M targeted ounces, ~23.2 Moz are in reserves and ~5.3 Moz are in NRM as of 12/31/2009. See slides 17-21 for further information regarding non-reserve mineralization (NRM)

² Of the 4-5B targeted pounds, ~3.3 Blb are in reserves and ~0.5 Blb are in NRM as of 12/31/2009.

Optionality

Simultaneously advancing up to 20 million targeted equity ounces¹ gold and up to 2 billion equity pounds² copper in earlier stage projects

Early Stage Opportunities

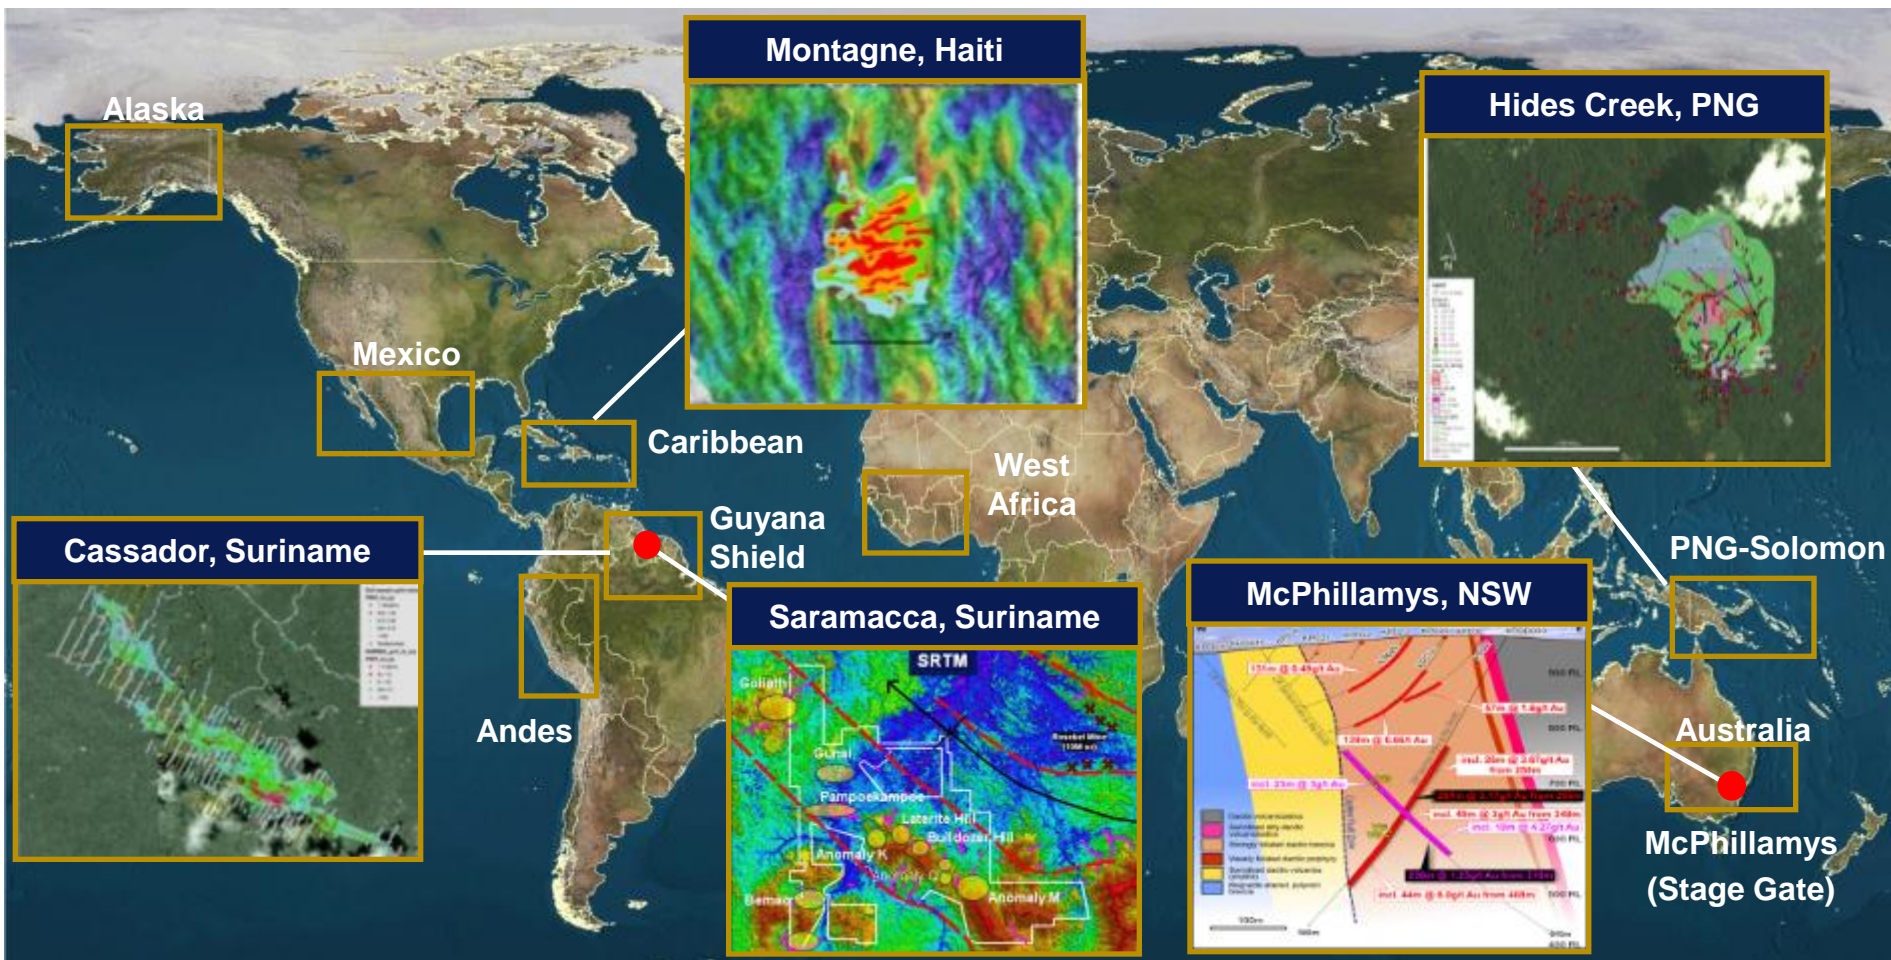

¹ Of the 20M targeted ounces, ~5.7 Moz are in reserves and ~4.8 Moz are in NRM as of 12/31/2009

² Of the 2B targeted pounds, ~1.2 Blb are in reserves and ~0.7Blb are in NRM as of 12/31/2009

Optionality

Generative Exploration - Making discoveries leveraging our land position in the world's most prospective domains

● Discoveries

□ Generative Exploration program

Execution

Boddington Ramp-Up

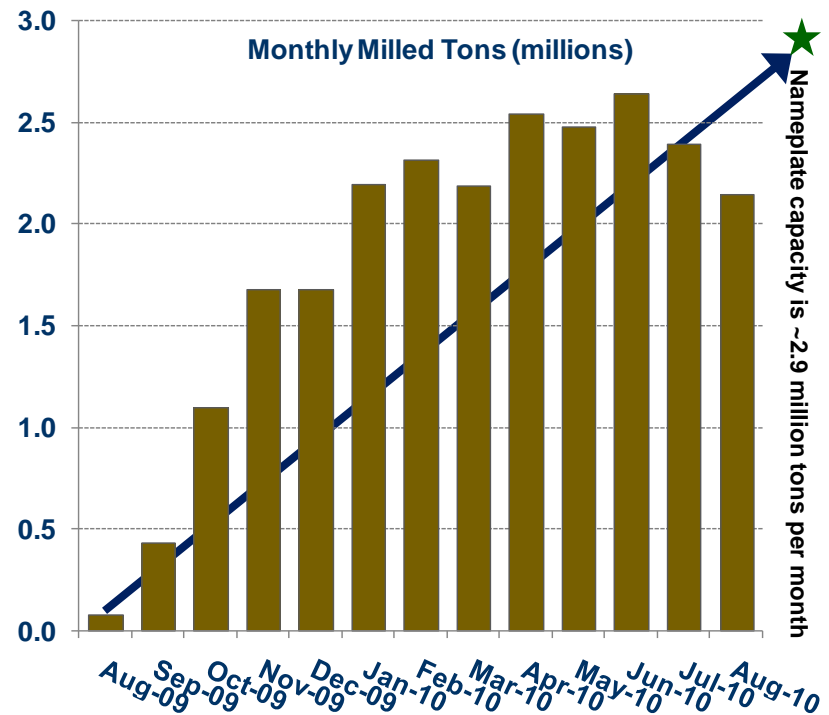

As of our Q2 Earnings Release on July 28, 2010:

Positives

- ✓ Recoveries (Au and Cu)
- ✓ ~23% more contained copper¹ through Q2 2010
- ✓ Concentrate quality
- ✓ HPGR performance
- ✓ Wet plant performance

Challenges

- ~12% less contained gold¹ through Q2 2010
- Dry plant wear rates
- Mining costs
- Fragmentation

		Q4 '09	Q1 '10	Q2 '10
Production	Au (Koz)	118	158	184
	Cu (Mlbs)	10	14	15
CAS (\$/oz)	Co-product	\$468	\$532	\$582
	By-product ²	\$352	\$436	\$503

¹ Model reconciliation based on 2% of reserves mined, with contained metal compared against modeled estimates

² Refer to slide 16 for reconciliation of Co-Product Costs Applicable to Sales to By-Product Costs Applicable to Sales

Leadership Sustainability and Community Relations

- Received 2010 Secretary of Defense Employer Support Freedom Award
 - One of 15 recipients for outstanding support to employees serving in the Guard and Reserve
- Ranked 16th overall on *100 Best Corporate Citizens* list profiled by *Corporate Responsibility Magazine*
- Fourth consecutive year selected to the Dow Jones Sustainability World Index
- International Cyanide Certification
 - 100% certified (except Boddington – still in ramp-up)
- Received 2010 Business Eco-efficiency Award in Peru
- Winner of 2010 Global Business Coalition Award in Ghana

Santong River restoration - Batu Hijau, Indonesia

Investing in Newmont

Continuing to Deliver Operational Execution, Gold Price Leverage and Project Development

1. **Execution**

Operational excellence and strong track record

2. **Cash Flow and Leverage to Gold Price**

Superior operating and free cash flow generation TODAY

3. **Flexibility**

Strong balance sheet to fund internal project development and strategic opportunities

4. **Optionality**

Robust pipeline of development opportunities

5. **Leadership**

Leading sustainability, community relations and human resource development practices

Cautionary Statement Regarding 2010 Outlook

2010 Outlook projections contained in this presentation (“Outlook”) are considered “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended which are intended to be covered by the safe harbor created by such sections and other applicable laws. Outlook represents management’s good faith estimates or expectations of future results as of July 28, 2010 and is based upon certain assumptions. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates, being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; and (vii) the accuracy of our current mineral reserve and mineral resource estimates. However, Outlook is subject to risks, uncertainties and other factors, including that such assumptions may prove to be incorrect and other factor referred to on slide, which could cause actual results to differ materially from Outlook. Consequently, Outlook cannot be guaranteed. Investors are cautioned that the Company does not undertake to subsequently reaffirm, provide comfort or otherwise update Outlook to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Investors should not assume that any lack of update constitutes a current reaffirmation of Outlook. Continued reliance on Outlook after the date it is first issued is at investors’ own risk.

Reconciliation - Co-Product Costs Applicable to Sales to By-Product Costs Applicable to Sales

Sales and Costs applicable to sales for Boddington are presented in the Condensed Consolidated Financial Statements for both gold and copper due to the significant portion of copper production (approximately 15-20% of total sales based on the latest life-of-mine plan and metal price assumptions). The co-product method allocates costs applicable to sales to each metal based on specifically identifiable costs where applicable and on a relative proportion of sales values for other costs. Management also assesses the performance of the Boddington mine on a by-product basis due to the majority of sales being derived from gold and to determine contingent consideration payments to AngloGold. The by-product method deducts copper sales from costs applicable to sales as shown in the following table:

	Three months ended June 30, 2010		Six months ended June 30, 2010	
	Boddington	Consolidated	Boddington	Consolidated
(\$ million)				
Co-product costs applicable to sales - gold	\$ 113	\$ 760	\$ 193	\$ 1,519
Less copper margin:				
Sales - copper	40	298	79	792
Costs applicable to sales - copper	(25)	(98)	(49)	(214)
Copper margin	15	200	30	578
By-product costs applicable to sales - gold	\$ 98	\$ 560	\$ 163	\$ 941
Costs applicable to sales - gold (\$/oz)				
Co-product	\$ 582	\$ 492	\$ 560	\$ 486
By-product	\$ 503	\$ 362	\$ 474	\$ 301
Gold ounces sold (thousands)	194	1,546	344	3,127

⁽¹⁾ Reserves are calculated at a gold price of US\$800, A\$1000, or NZ\$1,200 per ounce unless otherwise noted. 2008 reserves were calculated at a gold price of US\$725, A\$850, or NZ\$1,000 per ounce unless otherwise noted. Tonnage amounts have been rounded to the nearest 100,000 unless they are less than 50,000, and gold ounces have been rounded to the nearest 100,000.

⁽²⁾ Includes undeveloped reserves at the Emigrant deposits for combined total undeveloped reserves of 1.2 million ounces.

⁽³⁾ Also contains reserves of 4.6 million ounces of silver with a metallurgical recovery of 88%.

⁽⁴⁾ Reserve estimates provided by Barrick, the operator of the Turquoise Ridge Joint Venture.

⁽⁵⁾ In-process material is the material on leach pads at the end of each year from which gold remains to be recovered. In-process material reserves are reported separately where tonnage or contained ounces are greater than 5% of the total site-reported reserves and contained ounces are greater than 100,000.

⁽⁶⁾ Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material in the mills. Stockpiles increase or decrease depending on current mine plans. Stockpile reserves are reported separately where tonnage or contained ounces are greater than 5% of the total site-reported reserves and contained ounces are greater than 100,000.

⁽⁷⁾ Deposit is currently undeveloped.

⁽⁸⁾ Reserves include the currently undeveloped deposit at Tapado Oeste (formerly called Corimayo), which contains undeveloped reserves of 1.2 million equity ounces.

⁽⁹⁾ Newmont divested its interest in Kori Kollo in July 2009.

⁽¹⁰⁾ Reserves estimates were provided by Buenaventura, the operator of the La Zanja project.

⁽¹¹⁾ Percentage reflects Newmont's economic interest at December 31, 2009. In November and December 2009 our economic interest increased from 45% to 52.44% as a result of transactions with a noncontrolling partner, partially offset by divestiture required under the Contract of Work.

⁽¹²⁾ Newmont acquired the remaining 33.33% of Boddington from AngloGold in June 2009.

⁽¹³⁾ Includes undeveloped reserves at Amoma, Yamfo South, Yamfo Central, Techire West, Subenso South, Subenso North, Yamfo Northeast, and Susuan totaling 3.7 million ounces.

⁽¹⁴⁾ Deposit is undeveloped.

Tonnage amounts have been rounded to the nearest 100,000 and pounds have been rounded to the nearest 10 million.

⁽²⁾ Deposit is undeveloped.

⁽³⁾ Percentage reflects Newmont's economic interest at December 31, 2009. In November and December 2009 our economic interest increased from 45% to 52.44% as a result of transactions with a noncontrolling partner, partially offset by divestiture required under the Contract of Work.

⁽⁴⁾ Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material. Stockpiles increase or decrease depending on current mine plans. Stockpiles are reported separately where tonnage or contained metal are greater than 5% of the total site reported reserves.

⁽⁵⁾ Newmont acquired the remaining 33.33% of Boddington from AngloGold in June 2009.

(1) Mineralized material is reported exclusive of reserves.

(2) Mineralized Material calculated at a gold price of US\$950, A\$1,200, or NZ\$1,400 per ounce unless otherwise noted. 2008 Mineralized material was calculated at a gold price of US\$850, A\$1,000, or NZ\$1,175 per ounce. Tonnage amounts have been rounded to the nearest 100,000.

(3) Mineralized material estimates were provided by Barrick, the operator of the Turquoise Ridge Joint Venture.

(4) Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material in the mills. Stockpiles increase or decrease depending on current mine plans.

(5) Mineralized material estimates were provided by Buenaventura, the operator of the La Zanja Project.

(6) Percentage reflects Newmont's economic interest at December 31, 2009. In November and December 2009 our economic interest increased from 45% to 52.44% as a result of transactions with a noncontrolling partner, partially offset by divestiture required under the Contract of Work.

(7) Newmont acquired the remaining 33.33% of Boddington from AngloGold in June 2009.

(1) Mineralized material is reported exclusive of reserves.

(2) Mineralized material calculated at a copper price of US\$2.50 or A\$3.00 per pound unless otherwise noted. 2008 mineralized material was also calculated at a copper price of US\$2.50 or A\$3.00 per pound. Tonnage amounts have been rounded to the nearest 100,000.

(3) Percentage reflects Newmont's economic interest at December 31, 2009. In November and December 2009 our economic interest increased from 45% to 52.44% as a result of transactions with a noncontrolling partner, partially offset by divestiture required under the Contract of Work.

(4) Newmont acquired the remaining 33.33% of Boddington from AngloGold in June 2009.

Non-Reserve Mineralization Supplemental Information (continued)

DEFINITIONS

(1) The term “reserve” means that part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination. The term “economically,” as used in this definition, means that profitable extraction or production has been established or analytically demonstrated in a full feasibility study to be viable and justifiable under reasonable investment and market assumptions. The term “legally,” as used in this definition, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, Newmont must have a justifiable expectation, based on applicable laws and regulations, that issuance of permits or resolution of legal issues necessary for mining and processing at a particular deposit will be accomplished in the ordinary course and in a timeframe consistent with Newmont’s current mine plans. Reserves in this document are aggregated from the Proven and Probable classes.

(2) The term “non-reserve mineralization” or “NRM” refers to Measured, Indicated and/or Inferred materials, which are exclusive of reserves. Please see Slides 115 - 116 above for Newmont’s 2009 report on non-reserve mineralization. Newmont has determined that such non-reserve mineralization would be substantively the same as those prepared using the Guidelines established by the Society of Mining, Metallurgy and Exploration.

(3) The term “potential” refers to the aggregate of potential ore-grade material, including Proven and Probable reserves, Measured, Indicated and Inferred non-reserve mineralization, in addition to other potential ore-grade materials that have less certainty of conversion to reserves.

(4) References to “equity ounces” or “equity pounds” mean that portion of gold or copper produced, sold or included in proven and probable reserves that is attributable to our ownership or economic interest.

SUPPLEMENTAL INFORMATION AND CAUTIONARY STATEMENT REGARDING REPORTING OF RESERVES AND NRM

Ian Douglas, Newmont’s Group Executive of Reserves and Geostatistics, is the qualified person responsible for the preparation of the Reserve and non-reserve mineralization estimates in this presentation. The reserves disclosed in this presentation have been prepared in compliance with Industry Guide 7 published by the SEC. Non-reserve mineralization and potential has not been prepared in accordance with Industry Guide 7. Estimates of non-reserve mineralization and potential are subject to further exploration and development, are subject to many risks and highly speculative, and may not be converted to future reserves of the company. In addition, our current or future reserves and exploration and development projects may not result in new mineral producing operations. Even if significant mineralization is discovered and converted to reserves, it will likely take many years from the initial phases of exploration to development and ultimately to production, during which time the economic feasibility of production may change.

For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineralized material on Newmont’s material properties, as well as a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, please see Newmont’s most recent Annual Report on Form 10-K and other SEC filings.
